

## Costas Maranas receives the 2020 International Metabolic Engineering Award

Dr. Costas Maranas, Donald B. Broughton Professor, Department of Chemical Engineering, The Pennsylvania State University, and the Use-Inspired Research Domain Lead for the Center for Bioenergy Innovation (CBI), has received the 2020 International Metabolic Engineering Award.

The International Metabolic Engineering Award is intended to recognize an outstanding career contributor to the field of Metabolic Engineering.

As the CBI Use-Inspired-Research Domain Lead, Dr. Maranas is responsible for coordinating the integrative work of four research teams charged with delivering sustainable feedstocks and economically viable consolidated bioprocessing.

For each conference, an award of \$5000 cash and a commemorative plaque or etched crystal will be presented from the International Metabolic Engineering Society. The award for 2020 will be presented to the award recipient at the [Metabolic Engineering 13](#) conference in Honolulu, Hawaii.
