

During the CBI Annual Science Meeting in July 2019, students working in CBI were asked to prepare a three-minute “elevator” speech to describe their science and how it relates to the overall goals of CBI.

Three winners were chosen by a panel of scientific and non-scientific judges from the 12 participating students. A subset of the participants in the competition are available on the CBI website at: <https://cbi.ornl.gov/node/175>
